GALAXY STUDIO GATE COMPLIANCE CHARTER

- **`water_sort_coins`** - Records your secure gold coin balance.
- **`water_sort_unlocked_vessels` / `water_sort_unlocked_skins`** - Stores your purchased container vessels and custom visual skins.

This storage architecture means that if you choose to wipe your browser cache, perform a factory hardware reset, or uninstall your host container platform, your progress values will return to Level 1 with 10,000 Coins. This local dependency represents the ultimate physical safeguard of data ownership, keeping your logs offline.

4. EUROPEAN UNION GDPR & UNITED KINGDOM DATA RIGHTS

If you reside within the territory of the European Union, European Economic Area (EEA), or the United Kingdom, you hold specific legal rights governed under the **General Data Protection Regulation (GDPR)**. Since the game stores all attributes on your localized hardware, you are structurally empowered to execute these rights with sub-millisecond control:

- **The Right of Erasure:** You can completely "forget" all data in the system instantly by entering Settings and clicking "RESTART PROGRESS" or by manual clearing of browser memory.
- **The Right to Access:** You can audit local variables in real-time by launching your browser Developer Tools Console (`F12`), navigating to the "Application" or "Storage" tab, and viewing raw values.
- **The Right to Portability:** Local parameters can be manually exported or backed up by copying the keys from browser storage to a secondary running client.

5. CALIFORNIA CONSUMER PRIVACY ACT (CCPA) DISCLOSURES

The state of California awards residents unique controls surrounding commercial information processing. We make the following mandatory, binding assertions under penalty of law:

1. **We Do Not Sell Your Data:** Galaxy Studio Gate does not exchange, trade, rent, or lease any consumer activities, gameplay patterns, or device data to marketing brokers or data aggregation firms.
